Yaşıyan yabancı dilleri, o dilleri konuşan milletlerin duyuş ve düşünüşlerini tanımada bir vasıta olarak kabul ettiğimiz gibi zihinlerimizin bu konudaki çalışmalariyle kendi dilimizin de yeni hamleler ve yaratmalara ereceğini gözümüzde tutuyoruz. Medeni diller, yazarlarının, bilginlerinin emeği ile vücut bulurlar. Bunda şüphe yoktur. Fakat dilin yazarlar ve bilginler dışında o cins emekçileri vardır ki bunlar çok sabır istiyen gayretleriyle dilin kendi üstünde uzun çalışmalar yaparak onun malzemesini toplarlar; yapılışını incelerler; nasıl işlediğini bulup anlatırlar. Bunlar da başka bir anlayışta dilin hizmetinde bulunan bilginlerdir. Kültür adamları içerisinde bu cinsten olanlar çoğaldıkça, onların eserleri kendi dilimiz ve diğer diller için arttıkça dil bilinci ışıklanır ve kökleşir. Lûgatçileri bu zümre arasında görmek gerektir. Şemsettin Sami'yi, Tanzimat hamlesi içerisinde bu düşünceyledir ki sönmez bir yıldız olarak saygı ile ve hayranlıkla seyredip kalmıyoruz; ışığından hâlâ aydınlanmaktayız. Farsçadan Türkçeye, Türkçeden İngilizceye ve Türkçeden Fransızcaya olmak üzere hazırladıkları sözlükleriyle bu ilkemizi gerçekleştirmeye çalışan Ziya Şükûn, Vahid Moran ve Dr. Ali Süha Delilbaşı'ya minnet duymaktayız. Onlara katılacak eserleri ve sahiplerini aynı duygu ile arıyor ve bekliyoruz. Genç Türk nesilleri her sahifesinde yılların üzüntülü emekleri bulunan bu öğretici kitaplarda idraklerinin kuvvetlendirici istikbalini bulacaklardır.

ÖNSÖZ

Bu Sözlüğün hazırlanması ve basılması toptan yedi sene kadar sürdü. Bu uzunca zaman içinde Türkçede birçok değişiklikler oldu ve yeni sözlerle terimler kabul edildi. Çok yerinde olan bu yeniliklere göre kitapta vakit vakit düzeltmeler ve eklemeler yapıldı. Bunları gereken dikkatle yapmış olmakla beraber, kitabımın tam ve mükemmel bir eser olduğunu hiçbir zaman iddia edemem, hattâ birçok eksiklikleri ve kusurları olduğunu itiraf ederim. Ancak, Türk gençliğinin faydalanması için, yeni kabul edilen Türkçe teknik ve başka terimlerin kitapta eksiksiz olarak bulunmasına çok önem vermiş olduğumu belirtmeği doğru bulurum.

Gençlerimizin ve yabancıların eski eserlerimizi inceliyebilmelerine küçük bir yardım olmak üzere, Osmanlıca ve eski Türkçe birçok sözler de kitaba alınmıştır. Fakat, artık kullanılmıyan veya az kullanılan kelimeler ve cümleler birer kısaltma ile işaretlenmiştir. Bundan başka, her yeni kelimenin sonunda eski şekli ve her eski kelimenin sonunda da, çok defa, yeni şekli ince harflerle gösterilmiştir. Bunun, yeni ve eski kelimeleri hemen karşılaştırabilmek bakımından, faydalı olacağını sanıyorum.

Dilimizdeki halk ve atalar sözleri de, İngilizce tercümeleriyle ve bunlara karşılık olarak İngilizlerin kendi kullandıkları sözlerle birlikte, kitaba konmuştur.

Sözlüğün basılması sona yaklaşırken Anayasamız Türkçeleştirilmiştir. Yeni metindeki kelimelerin ve sözlerin çoğu kitabın içinde bulunmakla beraber, bulunmıyanlar da olduğundan, bunların hepsi toplu olarak kısa bir liste halinde kitabın sonuna eklenmiştir.

Sözlükte bazı baskı yanlışları kalmıştır. Bundan dolayı özür dilerim.

Kitabın yayınlanmasını sağlamış olan sayın zatlara ve Millî Eğitim Bakanlığına burada derin teşekkürlerimi sunarım.

Ayrıca bir önsöz yazmak lûtfunda bulunmuş olan Millî Eğitim Bakanımız sayın Hasan-Âli Yücel'e gösterdiği bu ilgi ve büyüklükten dolayı sonsuz minnet duymaktayım.

PREFACE

It has taken about seven years in all to compile and to priint this Dictionary. During this somewhat long period the Turkish language has undergone some changes, and many new words and technical terms have been introduced into it. It was necessary, therefore, to revise the manuscripts from time to time, and although I have done my best to include in the Work all these neologisms correctly, I can never claim that my book is a complete or perfect one, and I admit that it has many deficiencies. I should point out, however, that I have tried to include in the book as fully as possible new technical and other terms to the advantage of young Turkish students.

With a view to assist, as far as possible, the young Turkish generation and foreigners to study the old Turkish literature, many old words also are given in the DIctionary. Obsolete words however and those rarely used have been marked accordingly. Furthermore, at the end of each neologism its old form is added in small italics (and vice versa). I think this will be useful for the ready comparison of the new and old equivalents.

Turkish proverbs and sayings also appear in the Work with their translations, and when possible, with the corresponding phrases in the English language.

Shortly before the printing of the Dictionary was completed the Turkish Constitution or Organic Law was re-written in original Turkish with numerous additional new words. Although most of these new words appear in the main body of the Work, it has been considered preferable to add to the end of the Book a short list of all new words and phrases used in the text of the Constitution.

I regret that some misprints have remained in the Dictionary.

I take this opportunity to thank warmly the Ministry of Public Instruction and all persons whose assistance has facilitated the publication of this Work.

İstanbul, July 1945. **VAHİD MORAN**

Notes :

In Turkish every letter (vowel or consonant) has absolutely a single sound which is always pronounced separately and distinctly. There are neither diphthongs nor reduplicated or compound letters. Thus, (ch, gh, ph, sh, th) are pronounced everywhere and without exception as two distinct letters with their original and individ al alphabetic sounds, like (c-h, g-h, p-h, s-h, t-h)

The sign of prolongation or the circumflex (^) on the vowels (a, i, u) makes them either long vowels or serves to soften the preceding consonants g, k, l. For example, the word (âdi) is pronounced nearly as (father, far, car); (gâh, kâr) nearly as (**gy**ah, **ky**ar); (lâzım) as (**l**arge, b**l**ast); (metîn) is pronounced like (mach**i**ne) and (sükût, lûgat) as (ac**u**te, l**oo**k) respectively.
